

e-Learning for General Practice – e-GP

A high-quality educational resource for trainees and qualified doctors

- Covers all aspects of primary care, with interactive case studies and questions
- Written and peer-reviewed by leading clinical experts
- Developed in the UK by the Royal College of General Practitioners and Health Education England e-Learning for Healthcare

e-GP is a comprehensive e-learning programme aimed primarily at GP trainees. However, it is also an invaluable professional development tool for fully qualified physicians.

The learning sessions cover a vast array of topics, from palliative care through to pregnancy, intellectual disabilities, trauma, consultation skills, clinical supervision and physical examinations.

You can access e-GP via the Internet so you can study at home, in the workplace or even on the move.

key features at a glance

- **Comprehensive content**

e-GP provides structured learning to support either training or professional development. The content is arranged into bite-sized learning sessions, each lasting approximately 20 to 30 minutes.

- **Written by clinicians for clinicians**

This e-learning has been written by leading subject-matter experts from across the UK. It reflects the latest clinical thinking and developments.

- **Quality assurance**

The programme has been developed in collaboration with

the UK's Royal College of General Practitioners, so it meets the highest training and quality standards.

- **A flexible learning tool**

You can use e-GP for self-paced, individual study. However, it also provides a highly effective resource for teaching staff to use in group training sessions.

- **Convenient, easy access**

You can fit this e-learning flexibly around your work and study commitments since e-GP is available online.

In partnership with:

A flexible resource

The content has been written and peer-reviewed by leading clinical experts. Interactive elements, such as animations, videos and case studies, help to embed learning as well as encourage reflective thinking. Self-assessment questions also enable you to test your understanding of key concepts.

You can select modules that are relevant to your particular training needs and revisit the material as many times as needed. You can also track your progress online and download or print off a learning history for inclusion in your training or professional development portfolio.

Wide-ranging applications

e-GP is designed to support and enhance traditional learning approaches, such as classroom teaching. It helps to fill in knowledge gaps, prepare for assessments and appraisals and also support continuing professional development.

As an e-learning tool, e-GP provides access to standardised content, which means that you and other learners all use the same high-quality materials.

Furthermore, you can study at your own pace, around your work commitments – without having to take time out of the workplace.

e-GP offers an invaluable learning resource that you can access anytime, anywhere.

“ Being a GP is a busy job and fitting in education can be difficult, but it is essential. e-GP allows you to focus your mind on what you need to learn and it supports you with different approaches.

Alongside the tools that form the evidence for your appraisals and revalidation, e-GP is a great way to keep you on track in a constantly changing world. ”

Will Murdoch, Associate Director of Clinical Strategy NHS England (West Midlands) and a GP Partner, The Vitality Partnership
