

# e-Learning Anaesthesia

An award-winning e-learning resource in anaesthesia, pain and critical care medicine

- Developed in the UK by the Royal College of Anaesthetists and Health Education England e-Learning for Healthcare
- Covers the core knowledge and skills that underpin specialist training in anaesthesia, pain and critical care medicine
- Encompasses over 800 high-quality, peer-reviewed learning sessions with images, videos, animations and interactive self-assessment exercises

**e-Learning Anaesthesia (e-LA)** is a comprehensive online resource for trainee doctors, nurses and other anaesthesia practitioners. The e-learning programme is an invaluable educational resource for trainers and teaching staff. It also supports the professional development of fully qualified clinical professionals seeking to refresh and update their knowledge.

#### With e-LA, you can access:

- over 800 interactive and engaging e-learning sessions
- an extensive e-library of journal articles and self-assessment exercises relevant to both trainees and specialists
- e-MCQ assessments that match the standard of the UK postgraduate anaesthesia examinations

## key features at a glance

#### • Structured learning

e-LA provides a structured learning programme to support specialty training in anaesthesia and continuing professional development.

#### • High-quality content

e-LA combines the structure of a well-written textbook, the insight of an expert lecture and the interaction of a small group tutorial.

The learning content has been written and peer-reviewed by leading UK experts at the Royal College of Anaesthetists. The team of 400 authors and editors regularly reviews and updates the programme.

#### • Excellent user feedback

In feedback from users, over 90% rated the educational content as 'excellent' or 'good'<sup>1</sup>.

#### • Award-winning training

e-LA has won many international training awards, including a 'Gold' award for 'Best online or distance learning programme' from e-Learning Age.

#### • Easy access

You can fit the training into your busy work or study schedule since e-LA is available via the Internet. This resource can be accessed using both Windows-based and Mac computers as well as most mobile platforms.

<sup>1</sup> Based on feedback scores from users (2008 to 2016)

### e-learning sessions

Clustered into discrete modules, e-LA learning sessions cover the knowledge base and clinical skills required to support a career in anaesthesia. Each session takes around 20 to 30 minutes to complete.

With this e-learning, you'll use a variety of interactive features, which help to bring the subject matter to life and put theoretical knowledge into a practical context. Complex concepts are explored and carefully assembled using frame-by-frame animations to illustrate underlying points. This gives you an enhanced learning experience when compared with traditional textbook learning.

### A comprehensive e-library

e-LA features an extensive e-library of peer-reviewed articles that are

cross-referenced to the learning content. Self-assessment exercises associated with each article enable you to check your understanding of key concepts.

### Learning history

You can review your progress online and create reports on your activity and performance. These reports can be incorporated into your training or professional development portfolio and appraisals.

### Enhanced learning outcomes

e-LA can be used as a self-paced, self-directed training package or integrated with other learning methods, such as lectures and practical sessions. You can complete e-LA sessions in preparation for face-to-face learning. This provides excellent preparation for classroom

or work-based training – maximising your learning opportunities.

e-LA is a unique resource for healthcare professionals, with many thousands of users in the UK. Accessible anywhere, at any time, e-LA is now available for purchase by annual licence globally.

*“It is almost impossible to imagine anaesthesia training without e-Learning Anaesthesia. This unparalleled platform is a critical tool in the training of doctors in anaesthesia, pain and critical care medicine and it delivers the highest quality education for these specialties.”*

**Dr J P Lomas, Chairman, Anaesthesia Trainee Representative Group**

## course content

The course modules are detailed below. You can either purchase the full programme or individual modules to suit your training needs. Take a look at the [full course curriculum](#).

Module 1:  
**An Introduction to Clinical Anaesthesia**

Module 2:  
**Consolidating Basic Clinical Practice**

Module 3:  
**Introduction to Critical Care**

Module 4:  
**Obstetric, Paediatric and Geriatric Anaesthesia**

Module 5:  
**Pain Management and Regional Anaesthesia**

Module 6:  
**Exam Preparation**

Module 7:  
**Basic Sciences:  
Anatomy  
Physiology  
Pharmacology  
Physics/Clinical Measurement  
Equipment and Maths/  
Statistics**

Module 8:  
**Obstetrics**

Module 9:  
**Ophthalmic Anaesthesia**

Module 10:  
**Regional Anaesthesia**

Module 11:  
**Vascular Anaesthesia**

Module 12:  
**Cardiac Anaesthesia**

Module 13:  
**Thoracic Anaesthesia**

Module 14:  
**Neuroanaesthesia**
