

Sexual health and HIV e-learning – eHIV-STI

Interactive e-learning to support specialist training in sexual health and HIV

- Features high-quality, interactive content with case studies, video clips and questions
- Suitable for clinicians, nurses, pharmacists and health advisors
- Developed by the British Association for Sexual Health and HIV (BASHH), the UK Royal Colleges of Physicians and Health Education England e-Learning for Healthcare

eHIV-STI is a quality-assured learning resource aimed at healthcare professionals working in the sexual health field.

The content covers a wide range of topics, including HIV testing and management, genital infestations, viral hepatitis and sexually infected infections (STIs).

The programme has been written in the UK by leading clinical experts from the sexual health field. So, it meets the highest quality standards.

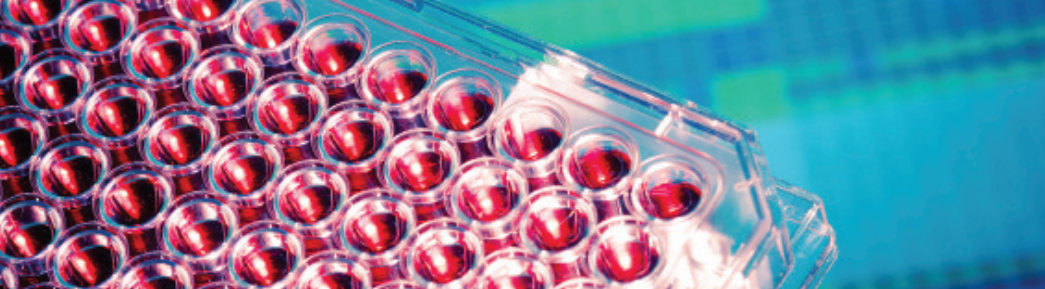

You can access eHIV-STI online and study in the clinical setting, at home or on the move.

key features at a glance

- **Comprehensive content**
The comprehensive e-learning sessions cover all aspects of sexual health and HIV. You can select sessions most suited to your training needs and interests.
- **Wide-ranging applications**
eHIV-STI provides the perfect learning resource for practitioners working in genito-urinary medicine, related specialties or general practice.
- **Highly engaging content**
Interactive features, including case studies, self-assessment exercises and video clips, provide a more engaging experience than textbook learning alone.
- **Consistent training**
eHIV-STI provides access to standardised content, which means that you and other learners all use the same, high-quality materials.
- **Convenient, easy access**
This quality-assured resource is available online so you can study anywhere, at any time.
- **Training and professional development**
The programme can be used for initial training or as a refresher on key themes. It has been endorsed by the Royal College of Physicians.

In partnership with:

Engaging content

The learning sessions include various interactive features, such as video clips, an image library, case studies and self-assessment exercises. This helps to foster deeper understanding and reinforce learning on key themes.

The programme is arranged into three levels (introductory, advanced and specialist) so you can tailor the learning to your needs.

You can complete the sessions in any order and record your progress online. Certificates of completion can be downloaded or printed as evidence of your learning.

Multi-professional use

eHIV-STI is ideally suited if you work as a:

- doctor/specialist in genito-urinary medicine
- specialist nurse, pharmacist or health advisor
- clinician in primary care or in a related specialty, such as dermatology, infectious diseases or gynaecology.

The content features a significant public health component and it can therefore be used in wider health programmes to tackle STIs and other related issues.

The programme also includes the pre-course learning component of the

BASHH Level 1 STI Foundation (STIF) course as a separate pathway. So, it is a highly versatile learning resource.

Best practice training

With *eHIV-STI*, you can train online at your own pace, around your work commitments – without having to take time away from your clinical duties.

PURCHASE NOW

“eHIV-STI is an essential knowledge framework written by senior clinicians and it provides flexible learning to fit in with busy working schedules.”

Jackie Sherrard, eHIV-STI Clinical Lead
