

Safeguarding Children and Young People

Essential e-learning for healthcare professionals who work with children

- Written and peer-reviewed by leading child health experts in the UK
- Features highly engaging content with images, videos, case studies and questions
- Developed by the Royal College of Paediatrics and Child Health, various partner organisations and Health Education England e-Learning for Healthcare

This high-quality e-learning programme is designed for healthcare professionals who have contact with children and young people.

The programme equips you with the knowledge to safeguard the welfare of children and young people and understand what action to take if you have concerns about their wellbeing

The content is suitable for general practitioners, nurses, consultants, paediatricians and non-clinical staff.

You can access this programme online and study in the workplace, at home or on the move.

key features at a glance

- **Structured learning**
This programme provides structured learning on safeguarding issues. The modules are divided into bite-sized e-learning sessions, with each session taking around 25 to 30 minutes to complete.
- **Wide-ranging applications**
This e-learning is suitable for all healthcare professionals, regardless of role, specialty or profession. The content is arranged into three competency levels – so you can select the level most suited to your needs.
- **Multimedia features**
You can use a wide range of interactive features, including images, video clips and case studies, which help to stimulate thinking and embed learning.
- **Quality assurance**
The content has been written by renowned experts in the child health field. It is updated regularly to reflect evolving practice.
- **A flexible training tool**
You can use this programme for self-paced, individual learning. It is also a highly effective teaching tool for trainers.
- **Easy, convenient access**
You can access the e-learning anywhere, at any time – studying around your busy working life.

In partnership with:

Comprehensive e-learning

You can explore a wide range of topics, including multi-agency working, communication, legal issues, defensive documentation and what to do if a child discloses abuse. The programme is packed with interactive features, including images, videos, case studies and self-assessment exercises. This helps to create a highly engaging learning experience and embed understanding on key themes.

The programme is mapped to the UK framework for training in this area – the intercollegiate *Safeguarding Children and Young People: Roles and Competences for Health Care Staff 2014*. However, the programme

themes are relevant to healthcare professionals worldwide.

You can select sessions most relevant to your training and interests. Certificates of completion can be printed off for your training or continuing professional development (CPD) portfolio. Evidence of completion also contributes towards appraisal and revalidation discussions.

Accessible anywhere, at any time

You can study online at your own pace, around your work commitments – without having to take time out of the workplace.

This world-class learning resource is already having a significant impact on safeguarding training and education

provision in the UK and it is now available globally.

PURCHASE NOW

“Having access to quality-reviewed safeguarding resources is valuable to the wide range of professionals involved in child protection. These resources provide a useful tool that can be used by individuals and also to train teams.”

Dr Geoff Debelle,
Officer for Child Protection, Royal College of Paediatrics and Child Health
